

**JULY 25, 2006**  
THE ESPANADE PARK, FREMANTLE  
7AM - 12NOON

# THE BEYOND NUCLEAR ALTERNATIVE ENERGY EXTRAVAGANZA!

**ALTERNATIVE ENERGY**

7AM TUESDAY 25 JULY  
CANDLELIGHT AND CAFFEINE VIGIL, EARLY BUT NECESSARY.

**INFORMATION STALLS**

8AM TUESDAY 25 JULY - CRITICAL MASS!  
GREET ARRIVAL OF DELEGATES TO NATIONAL  
URANIUM CONFERENCE AT ESPLANADE HOTEL.

**NUCLEAR FREE FAMILY FUN**

9AM - 1PM  
STALLS, SPEAKERS AND DISPLAYS - AN OPTIMISTIC  
ENERGY FUTURE THAT PUTS POWER WHERE IT BELONGS -  
WITH THE PEOPLE

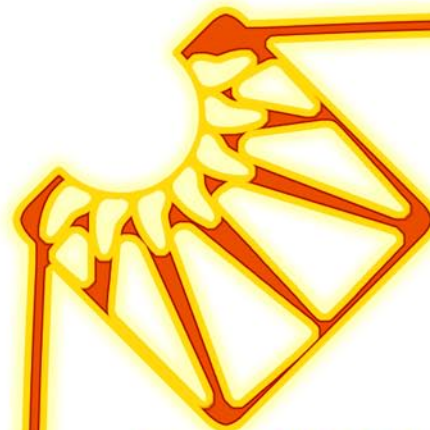

**FACE PAINTING**

THE NATIONAL URANIUM MINING INDUSTRY HAS AGAIN  
CHOSEN FREMANTLE TO HOST A CONFERENCE ON THE  
PROPOSED MAJOR EXPANSION OF URANIUM MINING.

WEDNESDAY 26 JULY  
MAINTAIN A PRESENCE TO REMIND CONFERENCE DELEGATES  
OF THEIR RESPONSIBILITIES TO PRESENT AND FUTURE GENERATIONS

WE'RE HERE TO PRESENT A MORE HOPEFUL ENERGY ALTERNATIVE  
THAN ONE WHICH LEAVES A MASSIVE RADIOACTIVE HEADACHE  
FOR OUR KIDS TO DEAL WITH. PLEASE JOIN US!

GET IN TOUCH! GET INFORMED! BETTER ACTIVE THAN RADIOACTIVE

## GETTING BEYOND NUCLEAR

The nuclear industry is holding a national gathering in Fremantle, in open defiance of the State Government ban on uranium mining in Western Australia. The conference is billed as "the most important event to be held for the Uranium Industry."

The Government of WA has banned uranium mining in this state for very good reasons. Unlike other minerals, uranium mining leaves behind millions of tonnes of radioactive and chemically hazardous wastes.

In the 2006 Federal Budget, \$7 million was set aside for further cleanup of 1950s era contaminated minesites in the Northern Territory. With the mining companies having long since departed, it has fallen to the taxpayer to clean up the mess.

Western Australia hosts a large proportion of Australia's uranium, and the mining industry is clamouring to get it out of the ground while world prices are rising. Altogether, Australia hosts 40% of the world's uranium.

The fact is, uranium mining is the first step into an obsolete and dangerous industry. Rather than scaling up uranium mining, we need to phase it out.

No other power source is so intimately tied to the production of weapons of mass destruction.

No other power source puts entire regions at risk of contamination and evacuation in the event of an accident or terrorist attack.

No other power source generates highly radiotoxic waste that must be completely isolated from the environment for tens of thousands of years.

## THE PARTY'S OVER

In May 2006, Spain joined Sweden, Germany, Italy and Belgium as the fifth European country to abandon nuclear power. British taxpayers are faced with a bill for £90 billion just to dismantle their first generation of nuclear plants, which has caused a rethink about whether to build more.

As far as the mining industry is concerned, this is about money.

We believe there's a lot more at stake. We all need to get serious about the real alternatives to the fossil economy that is heating up the planet. Nuclear is not the solution to climate change, or anything else.

Join us on the 25th and 26th to show your support for a future beyond nuclear - you're welcome at any time over the two day period, but especially at 8am on Tuesday 25th before work.
